# NATIONWIDE COVERAGE ON AMERICA'S LARGEST AND MOST DEPENDABLE NETWORKS

Tracfone uses the networks of major national wireless carriers. We have a vast national coverage area so you can make calls from almost anywhere in the U.S.

The map depicts the general coverage area and is not a guarantee of coverage. Coverage is not available everywhere. The map displays only the predicted and approximate wireless coverage for voice calls, while outdoors, of the network including roaming coverage, if applicable. Within coverage areas, there may be significant limitations or interruptions in coverage that may impact service and result in dropped and blocked connections, slower data speeds and call interference. You will not be able to operate your phone or make 911 calls if service is not available. Coverage maps are based on information provided by network carriers and public sources and we cannot guarantee their accuracy. Coverage maps may also vary based on your home location, phone and/or plan. Refer to our website for the latest coverage map applicable.
